Dear Valued Mersen Customers,

Rising production costs and inflationary pressures have necessitated a general price increase effective May 1, 2019. Mersen has worked to control costs in production & transportation, but finds it necessary to offset these rising costs with this price increase. The price increase averages approximately 5% and there is a limited amount of variation within product families.

Mersen will provide an updated published price sheet by March 1, 2019. The price sheet will be available in electronic form and made available on the Mersen portal, EPConnect.com for registered users. The price sheet will also be available through your local Mersen representative. Price updates will be provided to IDW and Trade Services for download on March 1st.

Orders placed prior to May 1, 2019 for stock items requesting immediate delivery will be billed at current prices. Mersen retains the right to limit quantities ordered prior to May 1st to typical historical levels. Any order entered on May 1st will be invoiced at the new price levels. Net pricing referenced on CSA and SPAs will be increased by the identified amount at time of renewal starting May 1st, 2019. All older quoted projects will be honored at the quoted price, terms and conditions.

At Mersen we are committed to providing innovative products for you and your customers safe and reliable electrical power solutions requirements. We appreciate your business, and thank you for your continued support.
